History: This message has been replied to.

Please write up a salient for the project that you worked on (See below) and forward what is provided to me. I'll consolidate them into one salient per Project. Cindy wants them to go out this week.

Lower Darby (Adam)
OPP Support (Robin, Joe and Norm)

Thank You,

Kevin Martin, Chemist

Subject: Fw: HSCD Salient Report Week Ending December 23, 2011

Kevin,

After things settle from the holidays I'd like several salients to be created. I sent you a separate email on the ORD HF study but I'd also like to keep up with some of the other projects we are working on. You can either write these yourself or coordinate with the analysts.

Below is the RICT announcement - we are working on this to help identify the analysis we can provide. Sue is the main contact.

Lower Darby - not on the salient report below but this is a project where we are going to support the remediation efforts with PCB aroclor analysis. Maybe search through the salient database to obtain some background information. That salient can go out the week of 1/9. The highlight for this salient is the fact that we are provided fast TATs.

OPP Support - we provided support on two ORD projects (Silverex and the TOC for Wetland??). We will need either separate salients or if it works okay make a combined salient.

When Cindy sends out these HSCD reports you could scan to see if there are any projects related to our current work. If there's a special situation involved we could submit a salient.

Thanks again,
Cindy

Incident-Specific RICT Activation - The Hazardous Site Cleanup Division (HSCD) Deputy Director is activating an incident-specific Regional Incident Coordination Team (RICT) to coordinate decisions and implement activities related to drinking water concerns involving Marcellus Shale drilling in Dimock, PA. The decision to activate the RICT was made after a briefing was held for the EPA Administrator on December 16 giving her options on how to address concerned citizens’ requests for federal help to ensure their drinking water is safe. The incident-specific RICT will meet on Thursday, December 22, 2011 at 10:00 a.m. in the Regional Response Center (RRC). (J. Goodwin, 4-5381)

Update on the Solar Feasibility Study at Standard Chlorine/Metachem Site in New Castle County, Delaware On January 4, 2012, EPA Headquarters will kick off this project with a conference call between the Department of Energy’s National Renewable Energy Lab (NREL), Region 3 and the Delaware Department of Natural Resources and Environmental Control (DNREC). NREL will be conducting a feasibility study at the Site to determine if sitting a solar array on this Site would be viable and cost effective. DNREC submitted the application for this study and this project was one of 26 selected nationwide. (Patricia Corbett)

HSCD Calendar of Activities

- Dec. 28

Carroll/Grayson/Galax LEPC Meeting

Galax, VA

Contact: Bob Kelly, 4-3268
- Jan. 10 - 12

Regional Response Team Meeting

Williamsburg, VA

Contact: Linda Marzulli, 4-3256
- Jan. 25

LEPC Presentation

Roane County, WV

Contact: Bob Kelly, 4-3268
- Feb. 1

LEPC Presentation

Cabell/Wayne, WV

Contact: Bob Kelly, 4-3268
- Feb. 16
